

# Viewing & Engaging with Classroom content

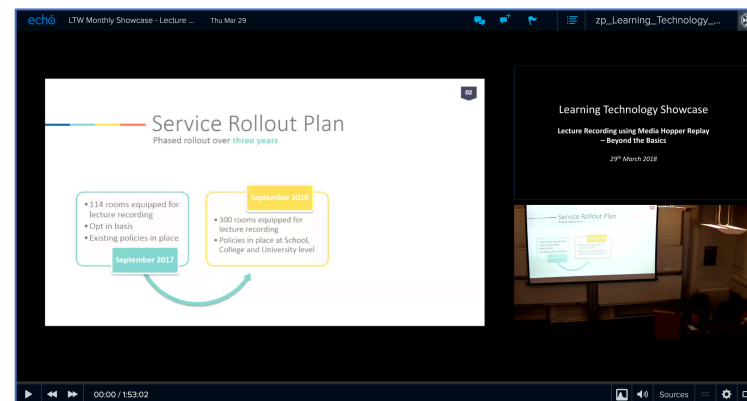

As a student Media Hopper Replay delivers on the core function of watching lectures again, but it also has a series of “in-class” tools which allow you to take notes, post and respond to questions, bookmarks points in the recording and, if necessary, mark specific points in the video or slides as confusing.

## Part One: Viewing content in the classroom

1. Login to Learn and navigate to your course;
2. Click in the **Media Hopper Replay** link to view all classes;
3. Click on the class row from the Class list as shown below;

4. You can use the playback bar at the bottom of the classroom viewer to control the video or navigate through presentation pages;

5. Clicking on any of the media panels will maximise it, by swapping it with the current largest displayed panel.
6. You can further change the layout by clicking on the **Layout** icon, located at the bottom right of the player, to change the layout of the items in the classroom.

## Part Two: Using the in-classroom tools for engagement

The Top Bar of the classroom contains the following information and tools (hovering over each also provides a label in case you forget):

1. The **Class Name and Date** appear in the top left of the Classroom window;
2. The **Notes** icon is a paper and pencil and opens the Notes panel;
3. The **double-balloon or conversation bubble icon** opens the **Discussions** panel to the right of the media view;
4. The **balloon icon with the plus sign** opens the Discussions panel but with a **New question** entry box open and ready for input;
5. The **Bookmark icon** allows students to bookmark a video location or slide;
6. The **flag icon** is for marking confusion.

## Note taking & editing

1. Click on the **Notes** icon in the toolbar to open the Notes panel;
2. Click in the **Notes panel** and start typing
3. At the end of each note you take, press the **Enter** key on your keyboard;

Location information (time or slide number) appears in the tag to the left of the note. These tags can be edited (if you need to change the location your note is referencing) or deleted (if video/presentation location doesn't matter). In addition to notes, any Bookmarks you set for the classroom content also appear in the Notes panel.

You can also download your notes from the classroom or from the Study Guide tab. This generates a text file containing your class notes.

# Viewing & Engaging with Classroom content

As a student Media Hopper Replay delivers on the core function of watching lectures again, but it also has a series of "in-class" tools which allow you to take notes, post and respond to questions, bookmarks points in the recording and, if necessary, mark specific points in the video or slides as confusing.

## Viewing and Posting Questions in the Classroom

If you have a question while viewing a classroom presentation or want to respond to a question someone else asked about the class, select the **Discussions** icon from the toolbar. This is a toggle button which also closes the Questions panel when not needed.

To respond to a posted question, **click ON the question** in the discussion panel. The question expands to provide a Respond to this Question button as shown below.

Any posted question can generate multiple responses, generating discussions about the class material.

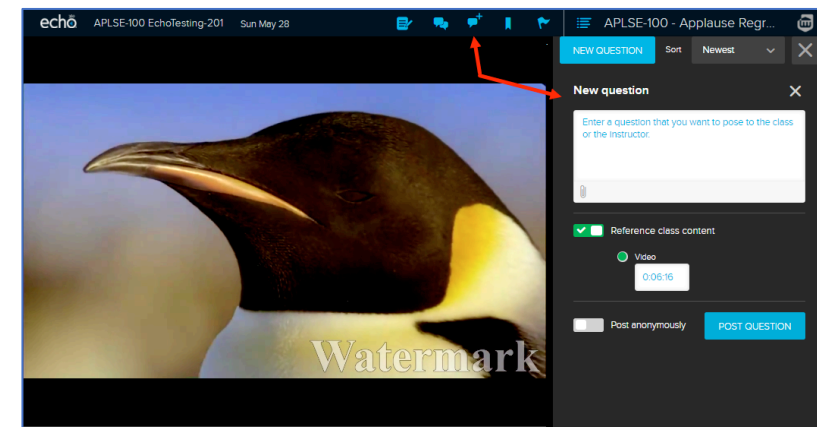

To "bookmark" a question, **click the bookmark icon** (this is shown in blue in the above figure). Your own posts are bookmarked automatically; bookmarking someone else's post adds it to your Study Guide notes for the class (if you are a student).

To endorse a particular post, **click the "thumbs up" icon**.

## Viewing and Posting Questions in the Classroom - continued

To post a question from the classroom:

1. In the classroom toolbar, click on the **New Question** icon;

2. Enter your text into the **New question** textbox;
3. If you wish to include an attachment, then click on the **paperclip** icon;
4. Select whether to **Reference class content** with your question. This simply means that the classroom presentation will sync to the question when another user selects it;
5. Enable the **Post anonymously** slider to post the question without your name. Instructors can see the authors of all posts; students cannot;
6. Click **Post Question**.

# Viewing & Engaging with Classroom content

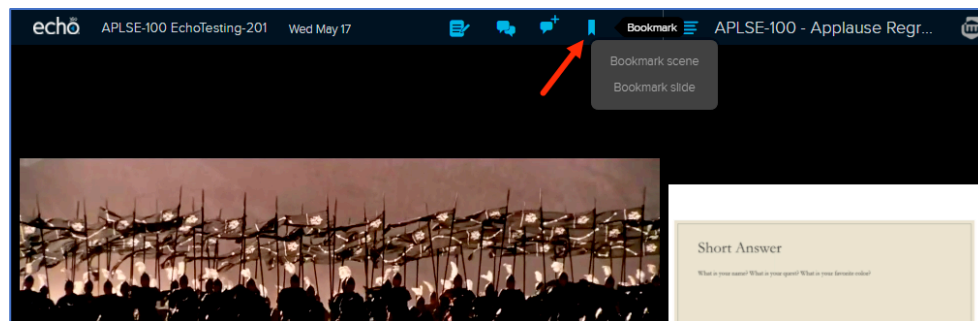

As a student Media Hopper Replay delivers on the core function of watching lectures again, but it also has a series of “in-class” tools which allow you to take notes, post and respond to questions, bookmarks points in the recording and, if necessary, mark specific points in the video or slides as confusing.

## Bookmarking content

Bookmarks let you mark locations in presentations or videos so you can find them quickly and easily, without having to page or scrub through the presentation/video.

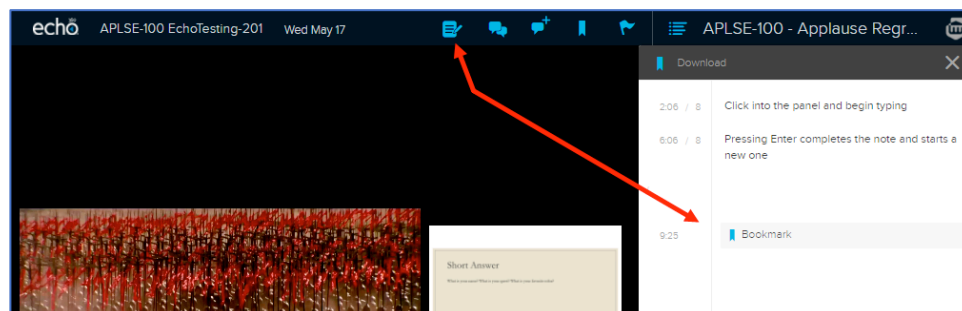

To Bookmark content:

1. Click on the **Bookmark** icon;

2. If the classroom has both a video and a presentation, select whether you are bookmarking the scene or the slide.

**Did anything happen?** If your Notes panel isn't open when you click to bookmark a location, it will look like nothing happened. Don't worry, the bookmark is there, in your notes. Re-clicking the bookmark within 30 seconds will un-bookmark the item, however, so try not to be too click-happy. Once your content is bookmarked, the Bookmark appears with your Notes. This allows you to click the bookmark and go to that location in the presentation/video (whichever you selected to bookmark).

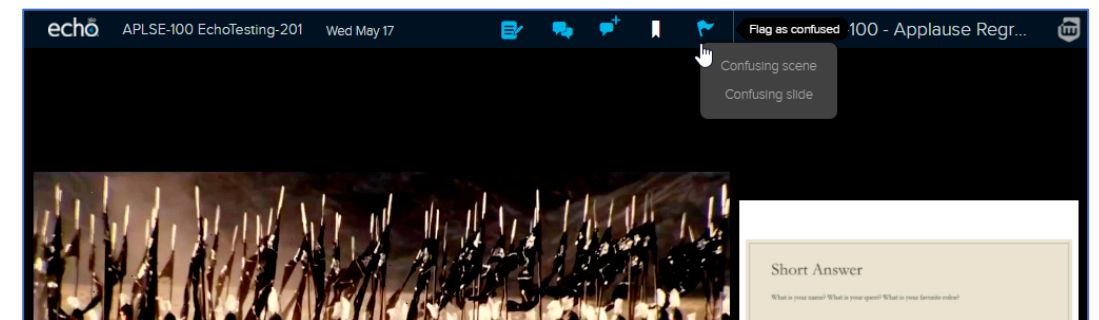

## Flagging content

Flags let you mark locations and material that you find confusing or items you feel the instructor may need to explain further to you or the class. Flagging content sends a notification to the instructor, letting them know that a student had some problem with the material. The notification flag includes the location of the presentation at the time it was flagged.

To Flag content:

1. Click on the **Flag as confused** icon;

2. If the classroom contains both a video and a presentation, you will be asked to select whether the scene is confusing or the slide is confusing. If you want to flag *both* items of content, click the flag a second time to make a second confusion flag for the other content type.

## Notes, Bookmarks and Questions Create a Study Guide

All of your classes can later be accessed through the student study guide. This will allow you to play back pieces you have bookmarked or written notes against and provide opportunities for assessment review. These notes can also be downloaded if you wish to use them with another tool.

To access the study guide, navigate to your course in Media Hopper Replay and click on **Study Guide**
